# Getting Started

This knowledge base runs on *DokuWiki* with **Markdown syntax enabled**.

- By default, all areas except `/public` and `/wiki` are private.
- Access is granted by administrators to specific areas of the Wiki. Whenever you need access to new wiki sections, contact **afeijoo@odins.es** or **jsanchez@odins.es**.
- Broadly speaking, pages and media are structured in folders and sub-folders.

## Use the Search Bar!

The search bar at the top of this page is quite powerful. We encourage you to use it instead of wasting time browsing the site tree.

## **\*\*Navigate\*\***

On the left hand side of the Wiki you have the sidebar, showing the site-tree with all the folders and pages you have access to. You can also use Sitemapon the top-right hand drop-down menu to get a bigger version on the tree.

## **\*\*Create a new page\*\***
